### NFL Overs & Unders – A Total-ly Different Perspective – Part 1

For nearly 6 decades wagering on the total points scored in NFL games has increased greatly in popularity. Totals allow the handicapper to concentrate on the flow or pace of a game rather than which team will have greater success. Obviously there is much overlap between the quality of the teams involved and the total points that will be scored but by looking at a game from an Over/Under perspective several weaknesses in the Totals line can be exploited. Of paramount importance is a knowledge of 'key' numbers for Totals much as 'key' numbers are important from a regular pointspread perspective.

In prior seasons our analysis covered all seasons beginning with 1981 such that in 2018 we looked at the 8,872 games played in the 37 seasons from 1981 through 2017. Much has changed over that time and for the sake of being a bit more current/relevant it's been decided to update our parameters to go back to 2002 when the most recent fundamental change in the structure of the NFL occurred – the introduction of 8 Divisions of 4 teams each. Between 2002 and 2023, a total of 22 seasons, there have been 5,679 regular season games played, a decently sized data base.

Here's a look at the key numbers for total points scored in those 5,679 NFL regular season games played between 2002 and 2023.

| Total Points | Pct. | | Total Points | Pct. | | Points Range | Pct. |
|---|---|---|---|---|---|---|---|
| 44 | 4.00 % | | 43 | 3.45 % | | 0 - 33 | 22.70 % |
| 41 | 3.82 % | | 47 | 3.15 % | | 34 - 41 | 21.59 % |
| 51 | 3.68 % | | 33 | 3.05 % | | 42 - 48 | 19.58 % |
| 37 | 3.59 % | | 48 | 2.91 % | | 49 - 57 | 18.79 % |
| 40 | 3.56 % | | 30 | 2.71 % | | 58 + | 17.34 % |

The first part of the Chart shows the ten most common total points results over the past 22 seasons and the percentage of the time that each has occurred. For example, 44 total points is the most common result and it has occurred 4.00% of the time, basically 1 game in 25. The 10 most common results have accounted for 33.91% of all results. In other words, slightly more than 1 game in 3 has fallen on one of these 10 'key' numbers.

The right hand part of the Chart looks at how frequently the total points in a game falls within one of five ranges. In a full schedule of 16 games 3 or 4 games should produce 33 or fewer total points as should 3 or 4 games produce between 34 and 41 total points, And roughly 2 or 3 games should fall between 42 and 48 total points, between 48 and 57 total points and more than 57 total points.

Note that the first range is limited to 33 possible outcomes (1 total point is not possible) and the final range of more than 57 points is unlimited. But also not that the 3 ranges in the middle (between 34 and 57 points) are comprised of just 24 possible outcomes yet in total represent essentially 60% of all results (59.96% to be precise). And those 24 outcomes across the 3 ranges cover ranges of 8, 7 and 9 possible outcomes!

Next week we will present some interesting data which will show why wagering on Overs and Unders presents some very good opportunities based partly on the above data and also on how the linesmaker is restricted in setting lines for Totals.

There are just 2 full weeks of regular season college football remaining with many traditional rivalry games taking place, even with the major changes in conference affiliation that took place this season. There will be 10 Conference Championship games played the following Friday and Saturday, December 6 and 7 with the 12 teams and their seedings announced the following day, Sunday, December 8.

The official end of the regular season takes place the following Saturday, December 14, with the annual Army vs Navy classic – the true America's Game. On that same day the Bowl season also begins with a pair of Bowls – the Camelia Bowl (expected to be a Sun Belt vs MAC matchup) and the Celebration Bowl (matching champions of 2 FCS conferences, the MEAC and the SWAC).

As noted above many of this week's and next week's games will also be traditional rivalry games with Bowl bids, rankings or just plain bragging rights for the next year at stake. Teams can earn Bowl bids or deny their biggest rival a Bowl bid with a win.

**COLLEGE SELECTION OF THE WEEK: ARIZONA STATE - 3 over Byu** – It almost seemed inevitable in recent weeks that BYU's perfect season would come to an end and it did last week at home as the Cougars were upset by 3-6 Kansas, 17-13, after they came from behind to defeat arch rival Utah 22-21 on a last minute FG. ASU continues to play outstanding football and have a shot at playing in the Big 12 conference game in its first season as a member and improving greatly from 3-9 last season, the first for coach Dillingham at ASU. It's interesting to note how often when a team loses its first game in midseason it follows up that loss with a loss in it's next game. This season its's happened to 4 teams that started 5-0 or better before tasting defeat for the first time (Iowa State, Liberty, Navy and Pitt). Will BYU be next? We think so. With a win this week over BYU and next week at arch rival Arizona ASU is very likely to face Colorado in the Big 12 Title game the following week. The Sun Devils are 5-0 both SU and ATS at home. Unlike BYU, which opened its season with a win over FCS Southern Illinois (currently just 3-8) ASU has played only FBS teams. Both of their losses were to Big 12 foes on the road (both as 5 ½ point dogs) by 8 and 10 points. Against 6 common foes BYU is 6-0 SU but just 3-3 ATS. ASU is 5-1 SU, 6-0 ATS. ASU has the better stats in those games albeit by a slight margin. Both teams are +9 in turnover margin and whereas most of the stats are reasonably close the key edge may be ASU's better rushing offense and rushing defense. Arizona State gets the huge win, 30-17.

**Other Featured College Selections**
**BOSTON COLLEGE + 3 over North Carolina** – BC got off to a solid 4-1 start for former NFL coach O'Brien in his BC debut but the Eagles dropped 4 of 5 since and at 5-5 need 1 more win for Bowl eligibility. BC is 4-1 SU, 3-2 ATS at home and will host Pitt in next week's finals. Carolina's had a streaky season with 3 wins, 4 losses and now have won 3 straight. Already Bowl eligible the Tar Heels are in a tough spot with their season ending game hosting key rival NC State next week and have lost 3 in a row to the Wolfpack. Neither team has played a tough ACC schedule as neither faced Miami or Clemson. BC did cover against ACC leader SMU last week (as a huge dog) and the stats were fairly even. The Eagles also played the tougher non-conference schedule. BC is in the better situation and we can justify UNC being the slight favorite considering their play in their current 3 game win streak. There's enough talent to suggest the upset. Boston College wins 34-27.

**Iowa - 6 ½ over MARYLAND** – Maryland started 3-1 but has lost 5 of 6 since. At 4-6 the Terps need 2 wins to make a Bowl. Iowa's already there at 6-4. They opened with a 40-0 wins over FBS Illinois State and their other 5 wins have been relative blowouts, winning by margins between 17 and 32 points including 4 vs Big 10 foes. The Hawkeyes are 1-3 on the road with the lone win by 17 at Bowl bound Minnesota. And Iowa's got an offense this season, topping 30 points in 5 of their 9 games vs FBS foes. They rely more on the rush than the pass. Maryland has a potent passing game with Iowa ranking a decent #49 vs the pass. Iowa Is #123 in passing offense but Maryland is #127 in pass defense. Iowa has the edge both in fewer turnovers lost (10 vs 15) and turnovers forced (20 vs 15). Against 3 common foes (Minnesota, Northwestern, Michigan State) Iowa was 2-1 SU & ATS, Maryland 0-3 SU & ATS. Iowa had most of the key stat edges in those games and had a +10.3 scoring margin whereas Maryland was - 18.3. Both lost to conference elites – Iowa at Ohio State, Maryland at Indiana. Since their 3-1 starts Iowa's played the much better football (3-3 vs 1-6). UM won their first game vs Iowa in the Terps' debut season in the Big 10 (2014) but Iowa's won all 3 since including 51-14 at Maryland in 2021, the most points Iowa's scored since 2018. Iowa has most of the edges in this matchup including coaching, pedigree, talent and the overall defensive edge. Iowa wins 31-13.

**Texas A&M - 2 ½ over AUBURN** – Both teams are off fairly easy wins over lower tier non-conference FBS teams. Each racked up over 500 yards of offense while allowing under 225 so both enter this contest with great confidence. Both have key rivalry games next week with this game having much more meaning for the visiting Aggeis than the hosts. Although 4-6 Auburn needs a win here AND next week at Alabama to make a Bowl game A&M controls its destiny to play in the SEC Title game. A win here makes next week's home

game vs Texas a "winner take all" game as the winner goes to the SEC Title game and the loser has to hope for an at large bid with A&M very unlikely to get one as a 3 loss team (lost at home to Notre Dame to open the season). Auburn's had a disappointing season in coach Freeze's second season (now 10-13 both SDU & ATS). Auburn's weakness has been turnovers, losing 19 while forcing just 8 (-11) vs FBS foes. A&M is +4 and also enjoys a huge 76 rank edge in our 'Factor X' measure of efficiency (#9 vs #85). Auburn's strength has been defense (6 of 9 FBS foes have scored 21 or fewer points) and the weakness has been the offense (scored 24 or less vs 7 of those 9 FBS foes). Other than the 44 points allowed to South Carolina 2 weeks ago which snapped A&M' 7 game win streak) NONE of their other 9 foes (including 1 FCS team) scored more than 24 points) while the Aggies scored 33 or more in 6 of their other 9 games). Against 2 common foes A&M beat both Arkansas and Missouri while Auburn lost to both with A&M having the far better stats (largely due to their 41-10 home win over then 4-0 Missouri). A&M has a chance for it's first 10 win season since 2012 (were 9-1 in Covid shortened 2020), quite an accomplishment in coach Elko's first season. Texas A&M wins 27-17.

[1] Tues Nov 19    [2] Wed, Nov 20    [4] Thurs, Nov 21    [4] Fri, Nov 22

**NFL SELECTION OF THE WEEK: Baltimore - 3 over L A CHARGERS (Monday)** – Billed as the Harbaugh Bowl, brothers Jim (LA) and John (Baltimore) meet for the first time since Super Bowl 47 when the Ravens held on to defeat Jim's 49ers 34-31. Since then the Ravens have enjoyed sustained NFL success while Jim returned to his alma mater and led Michigan to last season's national title. Here Baltimore is in a bounce back spot following last week's tough loss at Pittsburgh. The Chargers finally faced a top tier offense last week as the saw visiting Cincinnati wipe out a 27-6 Chargers second half lead to tie the game before L A got the game winning TD in the final minute. Now they face one of the league's top offenses (#1 in yards, #2 in points – the Chargers are #18 in both). LA has also benefitted from a relatively soft schedule as their 7 wins have come against teams that are 23-42 against the rest of the NFL. In contrast the Ravens/ 7 wins are vs teams that are 37-31 vs the rest of the league. Both teams like to run the football with Baltimore #2 in the NFL (177 ypg) and the Charges #11 (122 ypg). Baltimore's also #2 in defending the run (77 ypg) whereas the Chargers are also #11 in stopping the run (111 ypg). The Chargers do have the better pass defense which will is offset by the Raven's passing offense. It's the pass defense that's been Baltimore's vulnerability. It can be said that the Chargers are stepping up in class (although both lost 1 score games to Kansas City) but the overall body of work suggests Baltimore is the more reliable team, despite the concerns about their pass defense (from facing better teams and QBs). Especially after a loss. Baltimore's rises up to key the win, 27-16.

**Other Featured NFL Selections**:
**CHICAGO + 3 ½ over Minnesota –** The Bears are off their second excruciating last play loss in their last 4 games. Unlike Washington's "Hail Mary" touchdown last month, arch rival Green Bay blocked a last second FG attempt to preserve a 20-19 Packers win. But there was good new for Chicago in the rookie QB Williams had a solid game, perhaps benefitting from the change offensive coordinators earlier in the week. Minnesota had a rather dull win in Tennessee, improving to 8-2 and remains in second place in the contentious NFC North. How contentious? Excluding the 4 games between Division foes, the NFC North is 24-8 SU, 21-11 ATS ve the rest of the NFL. The Bears are 4-5 SU, 5-4 ATS in such games. Minny is 7-1 SU, 6-2 ATS. This is Chicago' first Division game. Excluding London games Minnesota's played well on the road (4-1) and the Bears have generally played well at home (3-2) although both home losses came the past 2 weeks to the Patriots and Packers. This game is critical if the Bears are to make any run at a Wild Card as their next 3 games are on the road against 3 Playoff caliber teams (Lions, 49ers, Vikings rematch). After winning 5 of 6 against the Vikes from 2018-2020 Minny had won 5 straight vs the Bears before Chicago won last season's finale. The Vikings' blitz quite a bit and Chicago rookie QB Williams has been sack as much as any QB in the league. Expect Chicago's new OC to be well prepared for Williams to handle the pressure as this will be the first time's the Vikes will see him. Minny's scoring on both sides of the football has declined over the last 5 game vs the first 5, dropping from 27.8 to 21.0 ppg scored and increasing from 15.2 ppg allowed to 18.8 ppg. It won't be easy and might be ugly but expect an improved Chicago offense, In an upset Chicago 20-17.

**MIAMI - 7 over New England –** The return of QB Tagovailoa has re-energized Miami which easily could be on a 4 game winning streak with a record of 6-4 rather than their actual 4-6. Tua played well in last minute losses at Buffalo and at home to Arizona before winning at the Rams and vs the Raiders the past 2 weeks. In the 4 games since his return Tua's gone 101 for 130 (77.7 %) with 7 TD passes and just 1 INT. Miami was just 1-3 in the 4 full games he missed and scored just 40 points while allowing 81. Miami seeks the Playoffs for a third straight season but the road does have some obstacles. This should not be one of the as the Fish have fared well vs the Pats in recent seasons. Including their 15-10 road win earlier this season (without Tua) the Dolphins have covered 8 straight in the series, going 7-1 SU. New England has been feisty. After their stunning opening upset win at Cincinnati the Pats lost 6 straight before splitting their last 4. The Pats scored more than 21 points just once – in a 25-22 last minute comeback win over the (hapless) Jets. After 2 great defensive efforts to open the season the Pats have allowed 8 of their 9 opponents since to rush for over r 100 yards including 5 times allowing over 145. Even without Tua Miami is averaging 128 rushing yards per game (#11). Miami's defense has been a pleasant strength, ranking #10 both against the run and the pass. Only Arizona has passed for more than 270 yards (307) and their last 4 opponents have rushed for between 60 and 94 yards after the defense allowed an average of 131 ypg in their first 6 games. With their run for the Playoffs difficult but not impossible every game is a key game for Miami. We call for Miami to win 27-13.

**GREEN BAY - 2 ½ over San Francisco** – Green Bay was fortunate to escape Chicago with a 20-19 win last week as the blocked a potential game winning FG as time expired.  The Pack was not impressive in that much needed win following their Bye and will need to up their level of play as the schedule with the next 3 games vs teams that made the Playoffs last season, beginning with the banged up 49ers.  The defending NFC Champs are 5-5 and in a 3 way tie for second behind leader Arizona (6-4) in the NFC West.  Much as with Kansas City and Buffalo, against the 49ers Green Bay is 3-1 in the regular season since 2018 but 0-3 in the Playoffs.  LaFleur and Shanahan have been head coaches in all but the 2018 meeting (won bu the Packers 33-30 in the regular season.  Green Bay is having the better regular season as the Niners have dealt with injuries, some season ending, since opening week.  Now QB Purdy is nursing a shoulder injury but is listed as probable in midweek.  Others, including DE Bosa, are listed as ???  Against 3 common foes (Arizona, L A Rams, Minnesota) the 49ers are 0-3 SU & ATS.  Green Bay is 2-1 SU & ATS.  The basic stats are pretty even but the scoring and turnover margins clearly favor the Pack (+8.0 ppg vs -3.4; +2 in turnovers vs -3).  Overall, the full season stats are also pretty even although the Packers have played, and fared better, against a tougher schedule.  The 49ers are dogs for the first time this season.  We agree.  Green Bay wins 27-20
